PROFESSIONAL SUMMARY

Backend-focused Computer Science student skilled in building scalable APIs and integrating machine learning models into production systems. Experienced with FastAPI, data analysis, and deploying ML-powered applications. Passionate about solving real-world problems through backend engineering and AI-driven products.

TECHNICAL SKILLS

Programming Languages:

Python, SQL

Backend Development:

FastAPI, REST API Development, JWT Authentication, CRUD Systems

Machine Learning & Data Science:

Pandas, NumPy, Scikit-learn, Exploratory Data Analysis (EDA), Regression Models

Tools & Platforms:

Git, GitHub, Streamlit, Render

Databases:

SQLite, MySQL (basic)

PROJECTS

WorkflowIQ – Smart Task Prioritization System

Tech Stack: FastAPI, Python, Streamlit, Render

- Built a task management backend that automatically prioritizes tasks based on deadlines and urgency.
- Implemented a custom **deadline-to-importance algorithm** to dynamically assign priority levels.
- Developed REST APIs for task creation, updates, and scheduling.
- Deployed the system using **Render (backend)** and **Streamlit (frontend interface)**.

GitHub: [Nandini140906/WorkflowIQ: AI based task prioritization web interface which will help you decide your daily tasks with less chaos of from where to start.](https://github.com/Nandini140906/WorkflowIQ)

Live Demo: [Streamlit](#)

Sleep Analyzer & Mood Prediction System

Tech Stack: Python, Machine Learning, Streamlit

- Built an ML-powered application through vibe coding that analyzes sleep patterns and predicts user mood based on behavioral inputs.
- Implemented machine learning models to identify correlations between sleep quality and emotional state.
- Used tools like Claude AI, GPT, Kimi AI for vibe coding purpose

GitHub: [Nandini140906/Sleep-Analyzer](https://github.com/Nandini140906/Sleep-Analyzer)

Exploratory Data Analysis Project

Tech Stack: Python, Pandas, Matplotlib, Seaborn

- Conducted detailed exploratory data analysis on a real-world dataset to identify trends and patterns.
- Performed data cleaning, feature analysis, and visualization to extract insights.
- Generated visual dashboards and statistical summaries to support data-driven conclusions.

GitHub: [Nandini140906/EDA_Diabetes_analysis: Exploratory data analysis on diabetic patients datasets with useful insights and visuliazation](https://github.com/Nandini140906/EDA_Diabetes_analysis)

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence

[G.H.Raisoni college of engineering and management, Nagpur]

Expected Graduation: 2028

KEY STRENGTHS

- Backend API development using FastAPI
- Deploying ML-enabled applications
- Data analysis and model evaluation
- Building practical, real-world software systems

INTERESTS

Backend Engineering • Machine Learning Systems • AI-powered Product Development
